

OceanBase 数据库适配

网络硬盘工程配置修改

修改网络硬盘工程 storage 配置文件

项目工程目录: `risenet-y9boot-webapp-storage/src/resources/application.yml`

修改数据源连接池配置

```
spring:
  datasource:
    druid:
      filter:
        wall:
          #关闭Druid防御SQL注入攻击的wallFilter，不然无法操作数据库
          enabled: false
      y9-public:
        driver-class-name: com.mysql.cj.jdbc.Driver
        #修改为oceanbase连接池url
        url: jdbc:mysql://obmt5wqwq8ynuyu8.huawei-cn-south-
1.oceanbase.cloud:3306/y9_public
        #修改为在oceanbase创建的账号
        username: risesoft@obmt5wqwq8ynuyu8
        #修改为在oceanbase创建的用户密码
        password: 'RiseSoft88@@'

  jpa:
    # oceanbase可用mysql方言适配
    database-platform: org.hibernate.dialect.MySQL8Dialect
    properties:
      hibernate:
        # oceanbase可用mysql方言适配
        dialect: org.hibernate.dialect.MySQL8Dialect
```
